

Delta fast charging station

- 2 1. Charging with GreenWay mobile application
- 5 2. Charging with GreenWay RFID card
- 8 3. Charging with Driver Zone (GreenWay web)

CCS2

CHAdeMO

Mennekes
(Type 2)

Remember: always stop charging with the same method you started.

1. Charging with GreenWay mobile application

1.1

Log in to the GreenWay Polska or GreenWay Slovakia mobile application. If you need to download it first, find it on the App Store or Google Play or scan one of the QR codes below.

1.2

On the map, click on the pin of the location you are interested in, and then expand the details of this location by clicking on the arrow next to the location name.

Charging with GreenWay mobile application

1.3 Connect the correct cable to the car.

1.4 In the location details, find the connector you are interested in. Then choose "Select" next to the selected connector.

1.5 After starting the charging process, you can observe its progress on the charger's display and in the mobile application. You will find there information regarding the time and power of charging as well as the state of charge of the battery.

IMPORTANT! Remember that when the battery capacity exceeds 80%, the charging speed drops significantly.

Charging with GreenWay mobile application

1.6 To finish charging, in the mobile app click Stop.

1.7 Disconnect the cable from the vehicle and put it back in its place.

IMPORTANT! If the vehicle prevents the cable from being disconnected by locking it inside the vehicle, unlock the vehicle or confirm disconnection of the connector directly in the vehicle.

ATTENTION! In case of emergency, you can stop charging any time using the red emergency button located below the charger display. After pushing the button, it is necessary to turn it and pull it back to its original position.

If you use the emergency button, please immediately contact our hotline available 24/7 at **+48 58 325 10 77** for Poland, and **+421 2 330 56 236** for Slovakia.

2. Charging with GreenWay RFID card

2.1 Choose the cable you are interested in and connect it to the car.

2.2 Hold the RFID card over the reader in the upper part of the charger display.

Charging with GreenWay RFID card

2.3

For the CCS connector, charging starts automatically after placing the RFID card against the reader. If you have selected a different connector, confirm its type by clicking on the button under its name on the charging station display.

2.4

After starting the charging process, you can observe its progress on the charger's display. You will find there information regarding the time and power of charging as well as the state of charge of the battery.

IMPORTANT! Remember that when the battery capacity exceeds 80%, the charging speed drops significantly.

2.5

To stop charging, use again the RFID card and hold it against the reader located in the upper part of the charger display, then click the button under the "End charge" text.

Charging with GreenWay RFID card

2.6
