** for charging stations with a payment terminal*

1. Charging with the GreenWay app through a QR code

1.1

Log in to the GreenWay mobile app. If you need to download it first, find it in the App Store or Google Play under the name GreenWay EV Charging, or scan one of the QR codes on the right.

1.2

Connect the correct cable to your car.

1.3

In the app, click the blue QR code icon (located in the lower right corner). Then scan the code visible on the station display.

1. Charging with the GreenWay app through a QR code

1.4

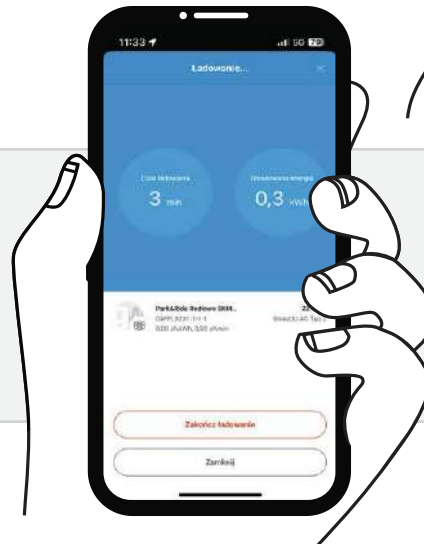

Once charging has started, you can monitor its progress on the charging station display and in the mobile application. There you will get information about the charging time and power, as well as the battery charge level.

IMPORTANT! Remember that after exceeding 80% battery capacity, the charging speed drops significantly.

1.5

To stop charging, in the app, click "Stop charging".

1.6

Disconnect the cable from the vehicle and put it back in place.

IMPORTANT! If the vehicle prevents disconnection of the cable by blocking it inside the vehicle, unlock the vehicle or confirm the connector disconnection directly in the vehicle.

NOTE! In an emergency, you can interrupt charging at any time by pressing the red emergency button located under the charging station display. After pressing the button, turn it and pull it so that it returns to its original position.

If you use the emergency button, please contact our hotline immediately, available 24/7, at **+48 58 325 10 77**.

2. Charging with the GreenWay app through station selection on the map

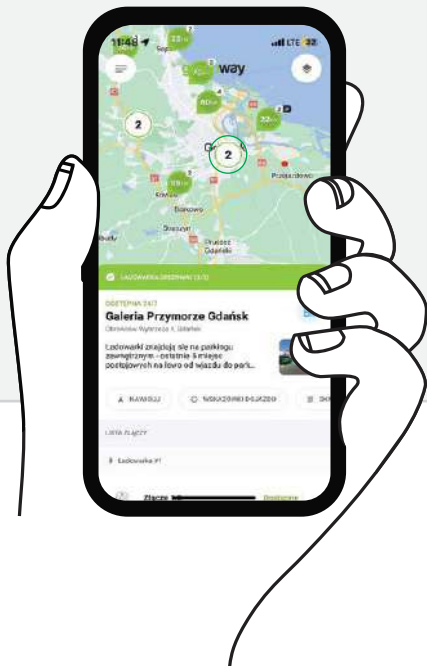

2.1

Log in to the GreenWay mobile app. If you need to download it first, find it in the App Store or Google Play under the name GreenWay EV Charging, or scan one of the QR codes on the right.

2.2

On the map, click the pin of the location you are interested in.

2.3

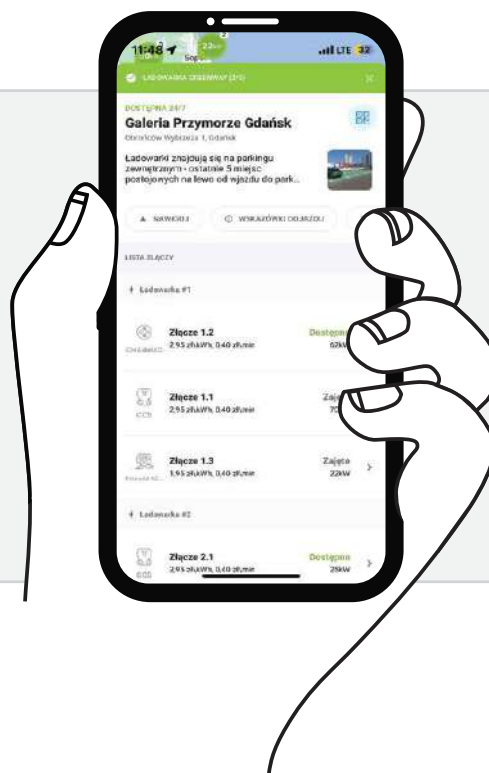

Connect the correct cable to your car.

2. Charging with the GreenWay app through station selection on the map

2.4

In the location details, find the connector you are interested in and click on it.

2.5

Once charging has started, you can monitor its progress on the charging station display and in the mobile application. There you will get information about the charging time and power, as well as the battery charge level.

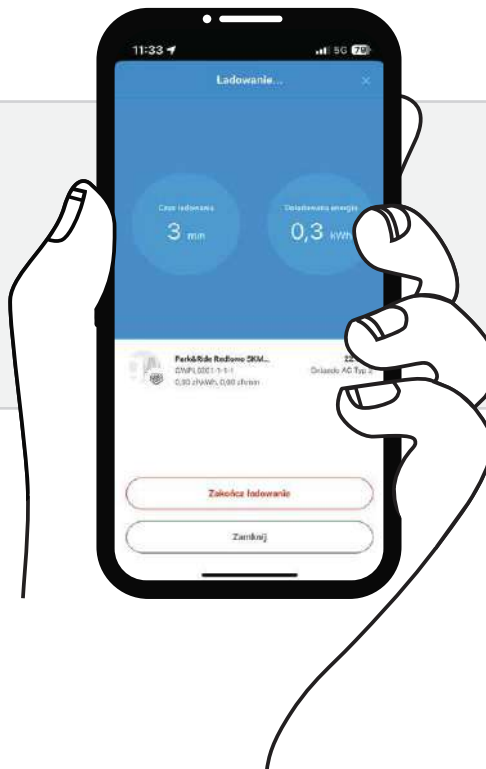

IMPORTANT! Remember that after exceeding 80% battery capacity, the charging speed drops significantly.

2. Charging with the GreenWay app through station selection on the map

2.6

To stop charging, in the app, click "Stop charging".

2.7

Disconnect the cable from the vehicle and put it back in place.

IMPORTANT! If the vehicle prevents disconnection of the cable by blocking it inside the vehicle, unlock the vehicle or confirm the connector disconnection directly in the vehicle.

NOTE! In an emergency, you can interrupt charging at any time by pressing the red emergency button located under the charging station display. After pressing the button, turn it and pull it so that it returns to its original position.

If you use the emergency button, please contact our hotline immediately, available 24/7, at **+48 58 325 10 77**.

3. Charging with RFID card

3.1

Select the cable you are interested in and connect it to the car.

3.2

Place your RFID card on the reader located under the display of the charging station.

3.3

For the CCS cable, charging starts automatically when you place the RFID card on the reader. If you have selected a different cable, confirm its type by clicking the button under its name on the charging station display.

3. Charging with RFID card

3.4

Once charging has started, you can observe its progress on the display of the charging station. There you will get information on the charging time and power, as well as the battery charge state.

IMPORTANT! Remember that after exceeding 80% battery capacity, the charging speed drops significantly.

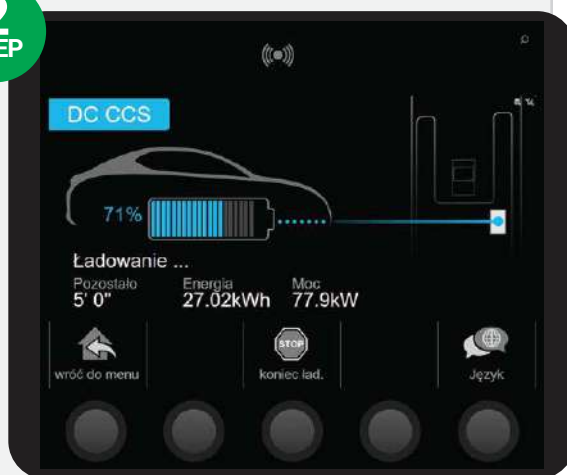

3.5

To stop charging, hold the RFID card against the reader located under the charging station screen again and then click the button under "Stop charging" on the station display.

1 STEP

2 STEP

3. Charging with RFID card

3.6

Disconnect the cable from the vehicle and put it back in place.

IMPORTANT! If the vehicle prevents disconnection of the cable by blocking it inside the vehicle, unlock the vehicle or confirm the connector disconnection directly in the vehicle.

NOTE! In an emergency, you can interrupt charging at any time by pressing the red emergency button located under the charging station display. After pressing the button, turn it and pull it so that it returns to its original position.

If you use the emergency button, please contact our hotline immediately, available 24/7, at **+48 58 325 10 77**.

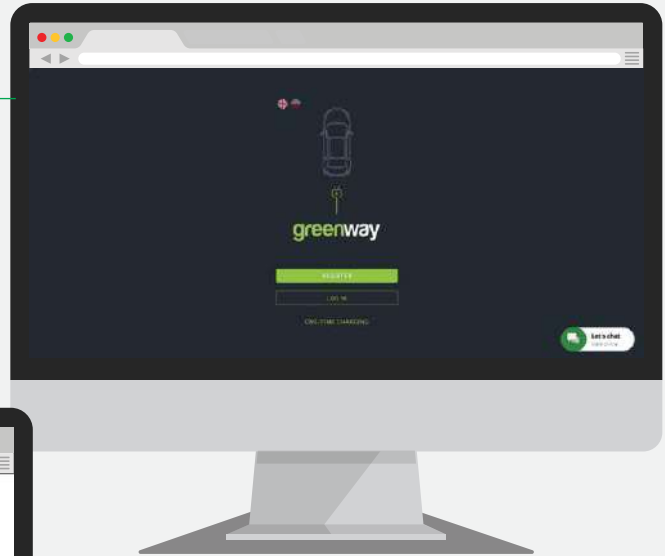

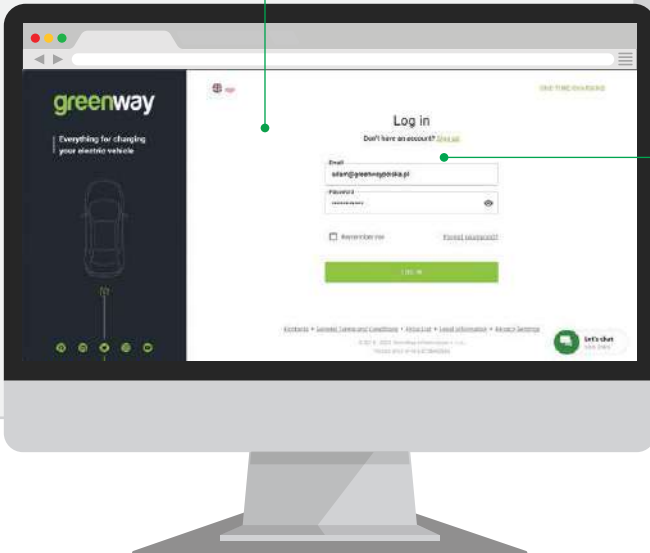

4. Charging with Client Zone

4.1

Go to client.greenwaypolska.pl and log in to your account by selecting the "Log in" option.

2
STEP

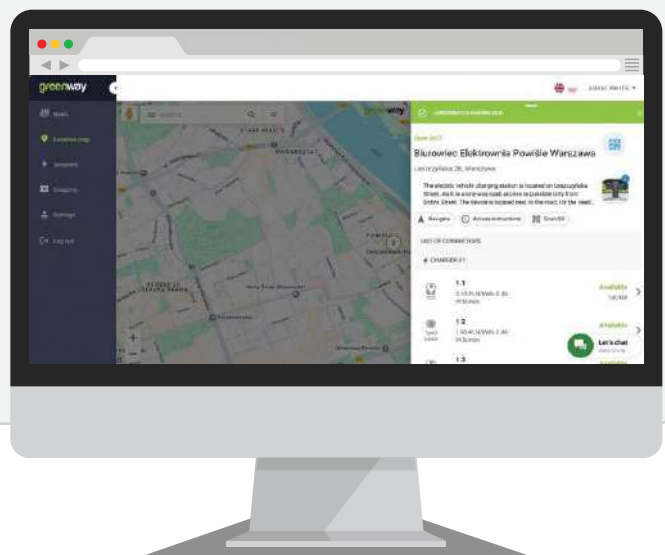

1
STEP

If you do not have an account, register by selecting the "Register" option.

4.2
